

Math for Everyday Life, Grade 11

This is a set of resources that can be used to teach a complete MEL3E course.

{mosmodule module=xj_download_MEL3E}

This is a set of resources that, along with the textbook and teacher resource book Math for Everyday Life 11 (Irwin), can be used to teach a complete MEL3E course.

The materials have been organized into weekly modules, each designed to fill five periods. Activities require teacher-centred and student-centred time, and many may serve as homework exercises.

There are no lesson or unit plans available for these materials. All course expectations should be covered if the materials are used as intended.
